

What's happening at BISC

Outstanding Academic Results

The school is delighted to announce the collective success of our recently graduated Year 13 students. Not only have they gone on to study at some of the world's most respected universities, but the quality of the courses they have elected to undertake are also some of the most prestigious.

Therefore, we are extremely proud to confirm just a few of the places and courses that our students have now commenced; Biomechanical Engineering at University College London, Automotive Engineering at Bath University, Politics Philosophy & Economics at Edinburgh University, Economics at Bacconi University, Medicine at Cairo University.

Finally, huge congratulations to all the other students who have also secured places at other universities around the world (including the USA, Spain, France & South Korea) and we wish you all the best in your future endeavours.
